

P.O. Box 298, Delphi, Indiana 46923

The Levelized Billing Plan is a convenience for our single phase members, especially those with total electric homes and those on fixed incomes.

The following conditions must be met in order to be considered for the levelized billing plan:

1. Member must have twelve months billing history at the same location.
2. Member must have a good credit rating and a zero account balance.

On this plan the Levelized bill amount will be calculated as follows:

The bill amount from the most current 12 months will be added less any miscellaneous or other charges, plus the account balance prior to calculation, then divided by 12 months. This becomes the average bill for the month. To the average bill we will add the current taxes, security light charges and miscellaneous or other charges. This amount will be your levelized billing for the month.

Failure on the part of the member to make any of the levelized monthly payments prior to the next month's billing will be cause for the discontinuation of the levelized billing plan with that member. Any outstanding amount will be due under regular payment terms.

If at any time, the member feels the levelized billing plan is no longer a benefit to him, he may contact our office and request to be removed from the plan. Again, any outstanding amount will be due under regular payment terms.

Please fill out the form below if you would like to be considered for the levelized billing plan or telephone our Billing Department at (765)564-2057 (local) or (800)506-7362 (long distance).
